

Pedal Board Range

A Diago Pedal Board is the most convenient way to organise, protect and transport your effects pedals. Our design combines a pedal board and hard case in one which is both lightweight and roadworthy. It's ideal for transporting your gear between gigs and practices, making set-up and take-down quick and hassle-free. It's also convenient for storing your pedals at home, so that they can be neatly hidden away from your wife/mother/significant other. Undo the catches, remove the lid, plug in your guitar, amp and power supply and you're ready to rock and roll. Easy! To find out more click [here](#).
